

It's time to start your  
transformative  
journey with  
CSI Dry Eye Software!

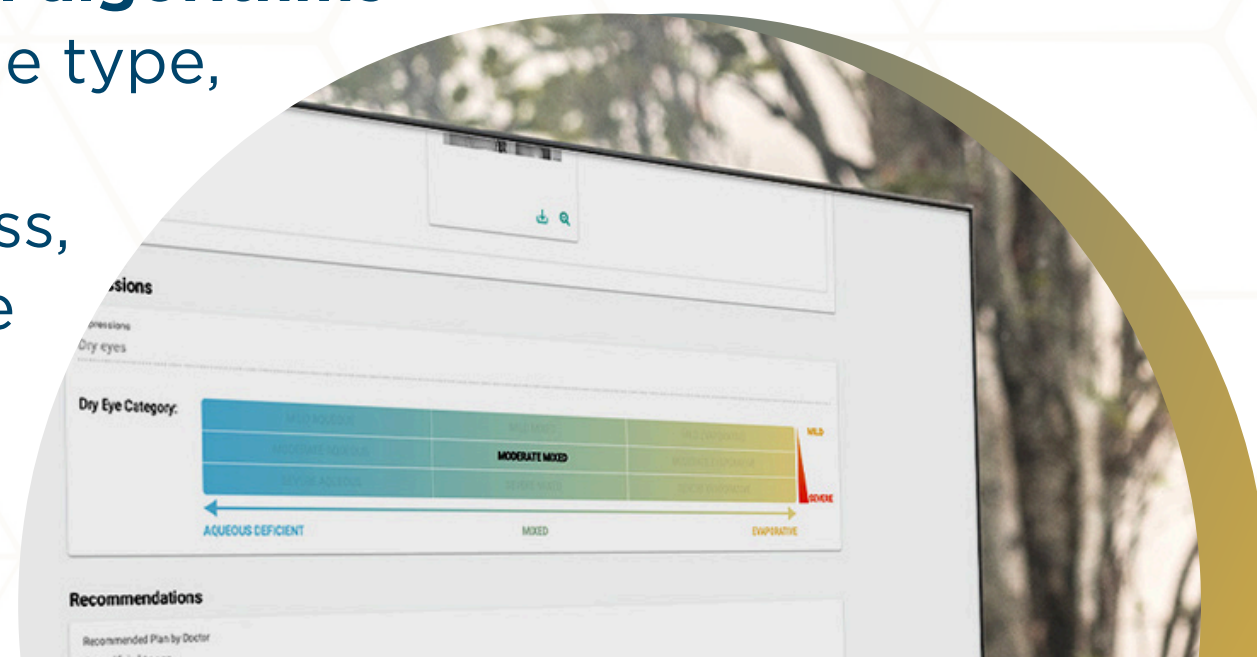

✉ info@csidryeye.com

🌐 www.csidryeye.com

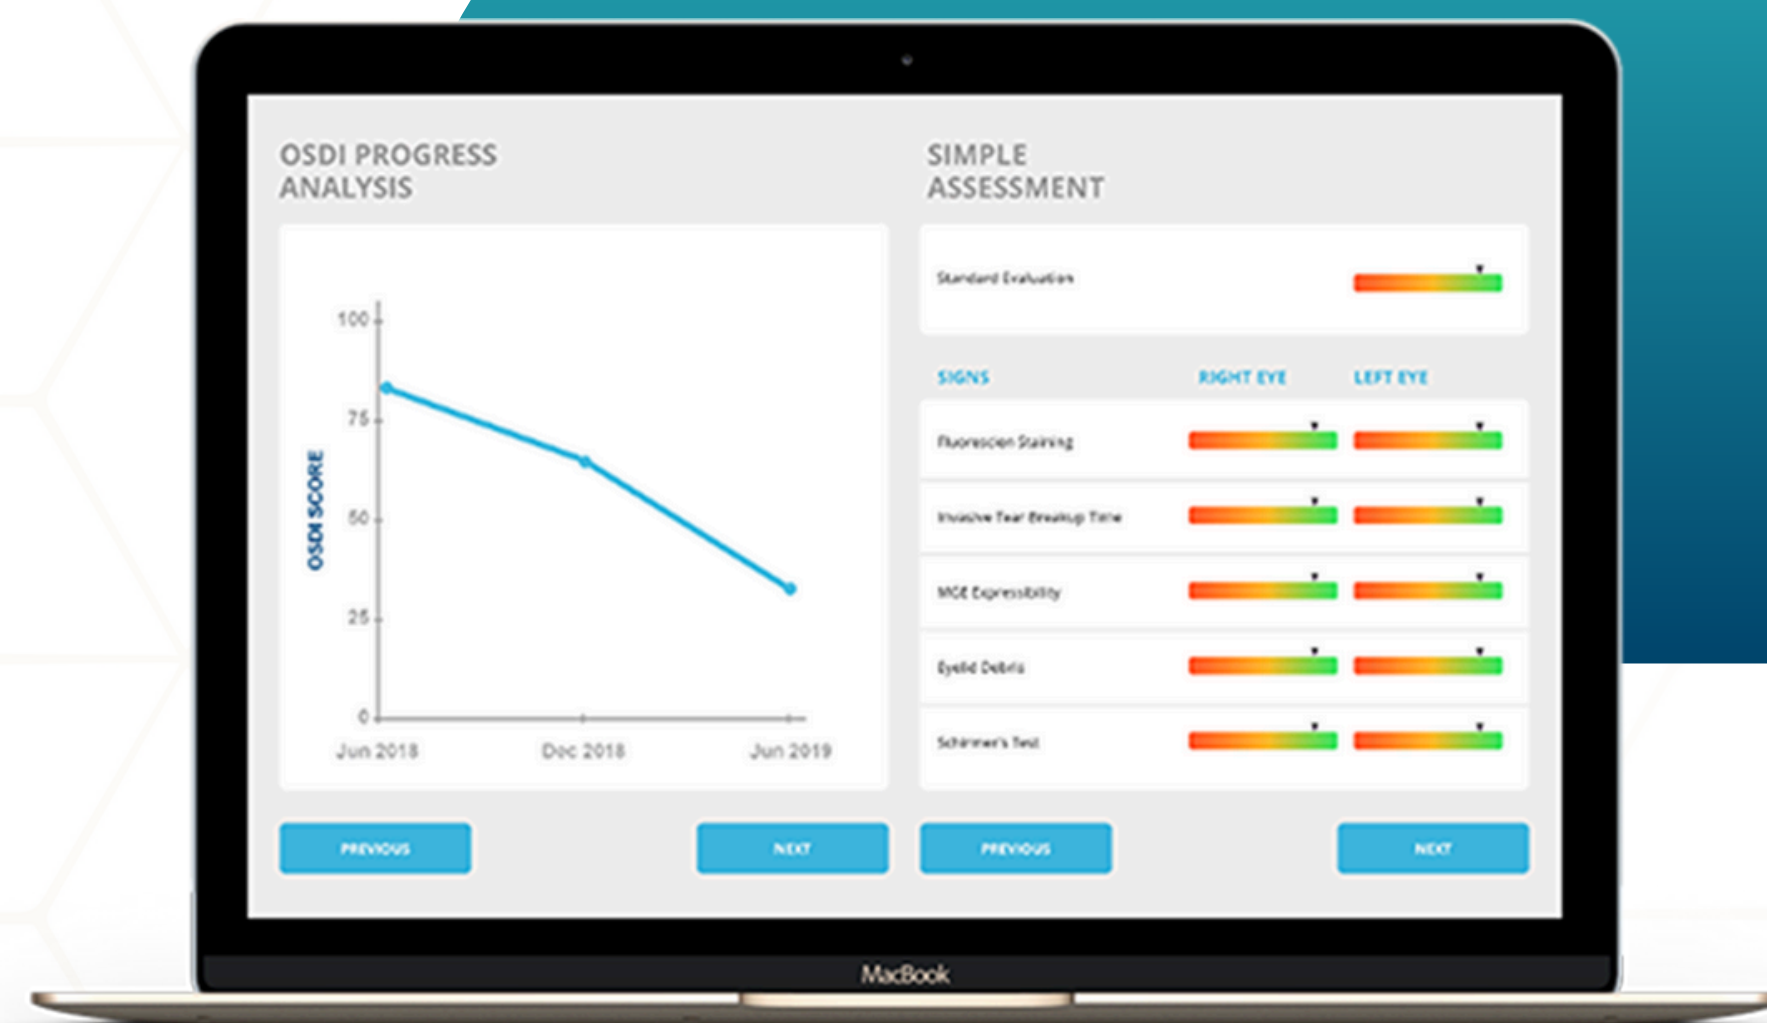

Using **Artificial Intelligence (AI)**, we can get a **quick but accurate scale of dry eye severity** to ensure we are treating the tear film when needed.

- 1. Personalized Dry Eye Plans** – analyzes patient profiles, medical history, and environment to predict treatment outcomes with precision.
- 2. AI in Dry Eye Diagnosis** – machine learning surpasses traditional methods in speed and accuracy, giving clinicians effective tools to manage dry eye efficiently.
- 3. AI in Ophthalmic Care** – advanced algorithms use patient data for earlier detection and individualized treatments, improving care and enhancing patient outcomes.

More **sophisticated AI algorithms** can further analyze the type, risk factors, and contributors to dryness, enabling more precise and personalized treatment choices for patients.

## A First-of-its-Kind AI-Powered Software for Dry Eye Management

Experience **improved dry eye treatment with AI-driven algorithms** that analyze patient profiles, histories, and environmental factors to **accurately predict treatment responses.**

Trusted by some of the  
Top Dry Eye Experts in the World.

Meet our MD KOLs

**Dr. Laura Periman, MD**  
**Founder**  
Dry Eye Master  
Seattle, WA, USA
